PRADEEP B

Learning & Development Lead | Campus to Corporate Training Specialist

+916381858166 | pradeepbashaa@gmail.com | linkedin.com/in/pradeepb-2k

PROFILE SUMMARY

L&D Lead with 4+ years of end to end training program ownership across India's premier engineering institutions. Architected a campus to corporate learning ecosystem at VIT University that drove placement rates from 70% to 90% impacting 7500+ students across campuses through structured technical, aptitude, and employability programs. Led and mentored a 25 member trainer team, owned full training operations including curriculum design, assessments, trainer allocation, and performance tracking.

Specialises in blended instructional design, Training Needs Analysis (TNA), LMS integrated delivery, and aligning learning outcomes with Tier 1 MNC recruitment criteria TCS, Infosys, Accenture, Wipro, and Cognizant. Brings an engineer's systems thinking approach to curriculum architecture, program scalability, and trainer enablement. Currently pursuing MBA in Systems Management (University of Madras) to deepen expertise in organisational learning strategy.

PROFESSIONAL EXPERIENCE

Technical Trainer - Academic Excellence Jul 2026 - Present

Employer: *Wrench Wise* | **Client:** *Sethu Institute of Technology (SIT), Madurai*

- Designed and launched a structured session plan, assessment framework, and student performance tracking system from the ground up for 3 academic batches establishing standardised training operations where none previously existed.
- Delivering technical training to 150+ students across AIML, CSD, and IoT programs, covering Java, Data Structures & Algorithms, SQL, and Git aligned with academic curriculum and industry hiring requirements.
- Built batchwise coding assessments and progress tracking sheets to monitor individual student performance, identify skill gaps, and deploy targeted interventions across batches.
- Coordinating with SIT faculty, Heads of Departments, and the placement team to align training objectives with employability and recruitment expectations.
- Built a custom Git visualiser tool from scratch to help students understand version control workflows through interactive visual representation directly reducing conceptual confusion and accelerating comprehension across AIML, CSD, and IoT batches.
- Designed and delivered supplementary problem pattern recognition sessions beyond the original training scope teaching students to identify, categorise, and systematically approach DSA problem types to improve speed and accuracy in technical assessments.

Environment: *Java, DSA, SQL, Git, LMS, Assessment Design, Performance Tracking, Technical Training*

Technical Trainer - Freelancer Jun 2026 - Jul 2026
Employer: *XplorePro* | **Client:** *KSR Institutions, Erode*

- Independently designed and delivered a structured Java and DSA training program for a batch of 70 third year engineering students from curriculum planning to final assessment, with full autonomy and no supervision.
- Built session plans, coding exercises, and assessment tools from scratch, calibrated to the technical proficiency level of the student cohort.
- Conducted hands on coding sessions focused on programming fundamentals, problem solving logic, data structures, and algorithm application.
- Administered coding assessments and practice evaluations to track student progress and identify individuals requiring additional targeted support.
- Drove batch assessment performance from 55% to 80% through structured feedback loops, targeted interventions, and additional problem pattern training sessions exceeding the engagement's original delivery scope within a single month.
- Introduced intensive problem pattern recognition training outside the original syllabus teaching students to identify recurring DSA and Java problem structures, directly contributing to the 25 point performance improvement across the batch.
- Delivered corporate readiness workshops on professional workplace behaviour, communication standards, and resume writing extending the program beyond technical training to full employability preparation for 70 students.

Environment: *Java, DSA, Problem Solving, Coding Assessments, VS Code, Technical Training*

L&D Team Lead / Technical Training Lead Feb 2025 - May 2026
Employer: *Ethnus Consultancy Services* | **Client:** *VIT University (AP Campus)*

- Drove campus placement rates from 70% to 90% by architecting and executing a Fullstack learning program spanning technical training, aptitude, communication, and corporate readiness directly impacting 600 - 900 students per semester across 10+ batches.
- Built and led a 25 member team of trainers and career coaches owning trainer allocation, performance reviews, delivery quality standards, and professional development across all programs.
- Designed and launched the campus's first structured mock interview and technical assessment system, creating a standardised evaluation framework used across all final and pre final year batches.
- Owned end to end training operations curriculum design, training schedules, batch management, assessments, LMS integration, and performance reporting with full accountability for program outcomes.
- Spearheaded curriculum modernisation integrating Java, DSA, AI Fundamentals, Cloud Computing, and adaptive learning methodologies aligning technical content with evolving MNC recruitment patterns.
- Coordinated directly with TCS, Infosys, Accenture, Wipro, and Cognizant hiring teams to align training outcomes, assessment formats, and student readiness with company-specific recruitment criteria.
- Established real time performance tracking and feedback mechanisms across 10+ batches enabling early identification of skill gaps and data driven interventions at both student and trainer level.
- Prepared and presented student performance, trainer effectiveness, and program health reports to academic leadership and placement stakeholders to support institutional decision-making.

Environment: *LMS, Java, DSA, Python, AI Fundamentals, Cloud Computing, Aptitude, Soft Skills, Google Workspace, Microsoft Excel, Assessment Platforms*

Senior Career Development Coach Mar 2024 - Jan 2025
Employer: *Ethnus Consultancy Services* | **Client:** *VIT University (Vellore and AP Campus)*

- Trained 6000+ engineering students across VIT campuses through large scale technical, aptitude, soft skills, and corporate readiness programs independently managing 20+ batches of 60 - 70 students each.
- Delivered company specific recruitment preparation programs for TCS, Accenture, Infosys, Wipro, and Cognizant with direct responsibility for technical aptitude, Java, DSA, and problem-solving tracks.
- Designed and implemented standardised training frameworks and learning materials across technical and communication programs reducing delivery inconsistency across high volume batch operations.
- Mentored and guided 15 junior trainers on session planning, technical content delivery, learner engagement strategies, and training quality standards.
- Designed and conducted mock interviews and recruitment readiness simulations to evaluate students technical knowledge, communication ability, and interview preparedness.
- Integrated gamified learning tools and analytical dashboards into training delivery to track learner engagement, monitor performance trends, and personalise intervention strategies.
- Monitored student assessment outcomes, attendance, coding proficiency, and placement readiness across batches identifying skill gaps and deploying targeted learning interventions.
- Conducted regular one on one progress reviews with students identified as high risk for placement providing personalised technical coaching, study plans, and targeted intervention to bridge individual skill gaps before recruitment drives.
- Collaborated with internal subject matter experts and senior trainers to continuously refine training content, incorporate emerging MNC assessment patterns, and ensure delivery quality remained aligned with evolving corporate hiring benchmarks.

Environment: *Java, DSA, Python, AI Fundamentals, Cloud Computing, Aptitude, LMS, Communication Skills, Data Analytics, Training Management Systems*

Career Development Coach Nov 2022 - Mar 2024
Employer: *Ethnus Consultancy Services* | **Client:** *VIT University (Vellore and Chennai Campus)*

- Delivered structured technical and career-readiness training programs covering Java, DSA, aptitude, logical reasoning, and verbal ability managing 20+ batches of 60 - 70 students each across VIT campuses.
- Conducted hands on programming sessions focused on Core Java, data structures, algorithms, and foundational problem solving techniques aligned with MNC recruitment patterns.
- Designed and administered technical, aptitude, and coding assessments developing company specific preparation materials tailored to TCS, Infosys, Wipro, and Accenture recruitment requirements.
- Facilitated mock interviews and group discussion sessions to strengthen students communication confidence, problem solving ability, and corporate readiness.
- Collaborated with placement teams to align training activities with institutional placement requirements and support student development toward interview readiness.
- Audited and rebuilt outdated training materials inherited at the start of the role replacing stale content with updated company specific question banks, revised Java and DSA practice sets, and refreshed aptitude modules aligned with current MNC recruitment formats.

Environment: *Java, DSA, Aptitude, Logical Reasoning, Verbal Ability, MS PowerPoint, Microsoft Excel, LMS, Online Teaching Platforms*

SKILLS

L&D & Instructional Design	Instructional Design, Training Needs Analysis (TNA), Curriculum Development, Blended Learning, ADDIE Framework, Assessment Design, Learning Program Management, Training Delivery, Learner Performance Monitoring, Campus to Corporate Training
Leadership & Management	Team Leadership (25 member trainer teams), Trainer Enablement, Strategic Planning, Program Coordination, Stakeholder Management, Performance Monitoring, Cross functional Team Management, Mentoring & Coaching
Training Platforms & LMS	Learning Management Systems (LMS), Google Classroom, Moodle, Digital Assessment Platforms, Gamified Learning Tools, AI driven Learning Integration
Programming & Technical	Java, Python, C++, JavaScript, HTML, Object Oriented Programming (OOP), Data Structures & Algorithms, DBMS, SQL, Git
Web & Frameworks	React.js, Node.js, MERN Stack, HTML5, GitHub, Eclipse IDE, IntelliJ IDEA, Visual Studio Code
Data & Analytics	Microsoft Excel (Advanced), Google Sheets, Performance Tracking Dashboards, Data Interpretation, Training Analytics
Interpersonal & Professional	Public Speaking, Communication, Presentation Skills, Conflict Resolution, Emotional Intelligence, Adaptability, Problem Solving

EDUCATION

- **Master of Business Administration**, Systems Management — 2025 - Present
  University of Madras, Chennai.
- **Bachelor Of Engineering**, Civil — 2018 - 2022
  Mepco Schlenk Engineering College, Sivakasi.

CERTIFICATIONS

- HackerRank Certified - Problem Solving Expert — 2026
- HackerRank Certified - Java Basics — 2026
- Google Analytics Certification — 2026
- IBM Certified - Artificial Intelligence Fundamentals — 2025
- AWS for Data Science - Simplilearn — 2025
- Coursera - Cloud Computing — 2025
- Certified in Java, Python & HTML — 2023
- AMCAT Certified Data Processing Specialist — 2023
